

Gerry Weston
President
Public Radio Partnership
Louisville, Ky. 40202

Dear F.C.C.,

I am writing today to encourage authorization of supplemental audio channel capability in conjunction with HD Radio. Multiplexing will allow us to expand our services here in Louisville, and will allow us to reach underserved audiences. It is also an incredible cost effective way of doing so, without the expense of adding frequencies.

We are extremely proud of our public service mission in Louisville. HD multiplexing would enable us to maximize further those programming and mission opportunities we can only dream about now. I highly encourage the Commission to make this happen. Thanks for your time.
